

September CELA Testimonials

I have a much better understand and depth of knowledge. Excellent faculty.

CNEE has become a resource I'll use daily.

My experience at the Academy will provide great policy and law making guidance. I will be able to discuss both sides of the clean energy argument with a great focus on the benefits of clean energy.

I feel that I am leaving having successfully identified actionable legislation concepts that would make a difference in my state.

The academy exceeded my expectations; It was much more participators and more collegial than anticipated.

The academy was a deep dive that actually gave information on drafting, the only conference I ever attended like it.

I learned a lot here, but the resources and contacts I received will be particularly helpful in working on policy moving forward.

CNEE has been a valuable mix of information and inspiration. I am already beginning to develop bills that are drawing directly on what I learned here. I also appreciate that the CNEE staff and faculty are making themselves available to consult with us as we work in the coming year.
